**TECH RESOURCES**

A person with a backpack is hiking on a rocky trail in a forest. The trail is made of large, dark, wet rocks. The forest is lush with green foliage and ferns. The lighting is soft and natural, suggesting a misty or overcast day. The person is in the middle ground, walking away from the camera towards a brighter area in the distance. Another person is visible further ahead on the trail.

**“Push through adversity to achieve success. I’ve learned that competition in extreme sports applies to all that we do at Zandur. Going above and beyond to achieve what it takes from product development to customer service.”**

*Rob Mckee, founder.*

# our story.

Zandur exists to offer innovative, sustainable, design-focused commercial flooring products. We strive to create the highest level of quality backed by industry leading experience with viable warranties.

All products are manufactured by or for Zandur in facilities that ensure fair, ethical treatment of workers, with responsible compensation and a safe working environment.

We are a family owned and operated company who believes firmly in sound ethics and strong personal relationships.

Living by our standards ensures that we can achieve our ultimate goal: to provide our clients with dedicated service, exceptional quality and solution-based sustainable design options needed to excel on projects.

# our clients.

A lush indoor garden with various green plants, including large-leafed tropical plants and smaller foliage. The floor is made of cork, and there is a dark rectangular panel with text. A hanging light fixture is visible in the top left corner.

**“We make products  
for your living  
environment; healthy,  
attractive, durable,  
and innovative.**

**That’s who we are and  
that’s what we do.”**

# FEATURES & BENEFITS.

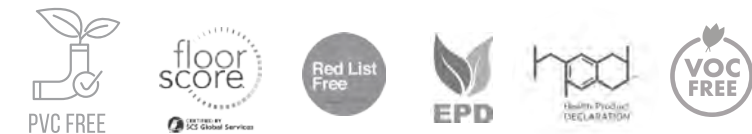

## 1 SUSTAINABLE MATERIALS

### HEALTH + WELLNESS

#### ENVIRONMENTALLY RESPONSIBLE

Zandur believes that as a manufacturer, we have a responsibility to the **Health + Wellness of the living environment**. We believe that there must be a balance between use of the natural environment and what is practical for the health + wellness of our clients' exposure to the finished product. Nitrile rubber is a controlled, man-made rubber that ensures we know exactly what raw materials are going into our products at all times, allowing for full transparency.

Zandur products are Red List Free, VOC Free, Indoor Air Quality and Floorscore compliant, contribute to LEED and most sustainability programs and are covered by factory specific EPD's and HPD's.

## 2 HIGHLY DURABLE

### HEAVY DUTY

#### PERFORMANCE + MAINTENANCE

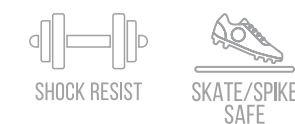

- Impermeable - All of our products are waterproof. Our Sophros Collection is approved for medical use and can be heat-welded + flash covered for **use in medial acute areas** or locations where fluids can be an issue. Zandur products have a solid vulcanized rubber wear layer (with exception of techne) to prevent liquids and contaminants from permeating the surface.
- High Traffic - Zandur Collections are engineered to provide superior durability making them appropriate for **extremely high-traffic areas** such as airports, hospitals, schools and retail.
- Rolling Loads - Flexible and resilient, Zandur products withstand heavy use and most are suitable for **heavy rolling loads**.
- No Residue - **Zandur does not use plasticizers** which means there will be no sticky, powdery residue often found on rubber products after installation; resulting in **easier maintenance than traditional rubber**.

\* General statements may not apply to each Zandur product. Always contact Zandur to verify product suitability.

#### SHOCK RESISTANT SKATE + SPIKE SAFE

Sustain, Flex, Sophros, and Techne fitness products offer increased protection of sub-floors from damage in the event weights or heavy objects are dropped on the floor. Flex Skate and Spike rubber is **designed to withstand excessive wear** in ice arenas or other sporting areas where skates or spikes come in contact with the floor.

## 3 SOUND REDUCTION

### SOUND + IMPACT REDUCTION

#### ACOUSTICAL BENEFITS + UNDERFOOT COMFORT

Zandur Sustain Cork Rubber has the highest reported IIC rating for its category. [4", no drop]

Acoustic benefits of rubber are already known for excellent sound deadening. Zandur **rates even higher across collections** in comparable testing data than other class options; making this a perfect choice for noisy school environments, hospitals, airports, grocery stores, retail, corporate offices and other high traffic public spaces.

# FEATURES & BENEFITS.

## 4 SAFETY FLOOR

### SAFETY ASSURANCE

#### HEALTH + SAFETY

- Slip Resistant - **Zandur surpasses the ADA recommendations** for slip resistance.
  - Sustain: Dry 1.07 / Wet 0.96
  - Flex: Dry 1.06 / 0.90
  - Sophros: Dry 0.96 / Wet 1.20
- Satin Finish - **non reflective high gloss** that can affect dementia patients and the visually impaired.
- Cushioned Comfort - Zandur is available in various thicknesses to help create a **softer underfoot experience** for joints compared to other types of hard-surface flooring.
- Naturally Antimicrobial - rubber is inherently antimicrobial and resists mold growth. **We do not use chemicals or additives.**
- Indoor Air Quality - Zandur **contains no VOCs or harmful chemicals** that can disrupt the immune system.

## 5 EASY MAINTENANCE

### SUPERIOR QUALITY

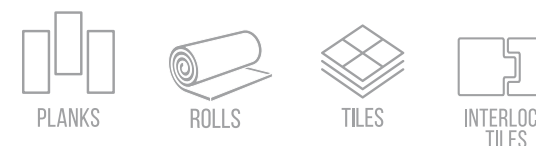

#### EASE OF INSTALL + CARE

A project comes to life through the installation process and maintains its visual performance properties through the cleaning process.

These are two crucial points we take into consideration during the product innovation process. Zandur offers a wide variety of products, installation materials and procedures to address specific site and use conditions that often present installation and maintenance challenges.

Zandur has **solutions for a host of common issues including sub-floor moisture, long term maintenance challenges and staining.** Since Zandur floors don't typically require a finish, you can achieve substantial savings over the life of the floor.

Our flooring utilizes a **matte finish - requiring no post-installation coatings.** Regular basic cleaning will ensure your Zandur floor maintains its quality for the duration.

## 6 STOCKING PROGRAM

### STOCKING PROGRAM

#### ALL COLORS + PATTERNS IN STOCK

**Zandur stocks ALL colors and patterns in every collection,** allowing for creativity and interchangeable options for scalable design using plank, tile and roll formats.

Zandur **products coordinate between lines** to create simplicity in style and design, making the specification and ordering process as efficient as possible.

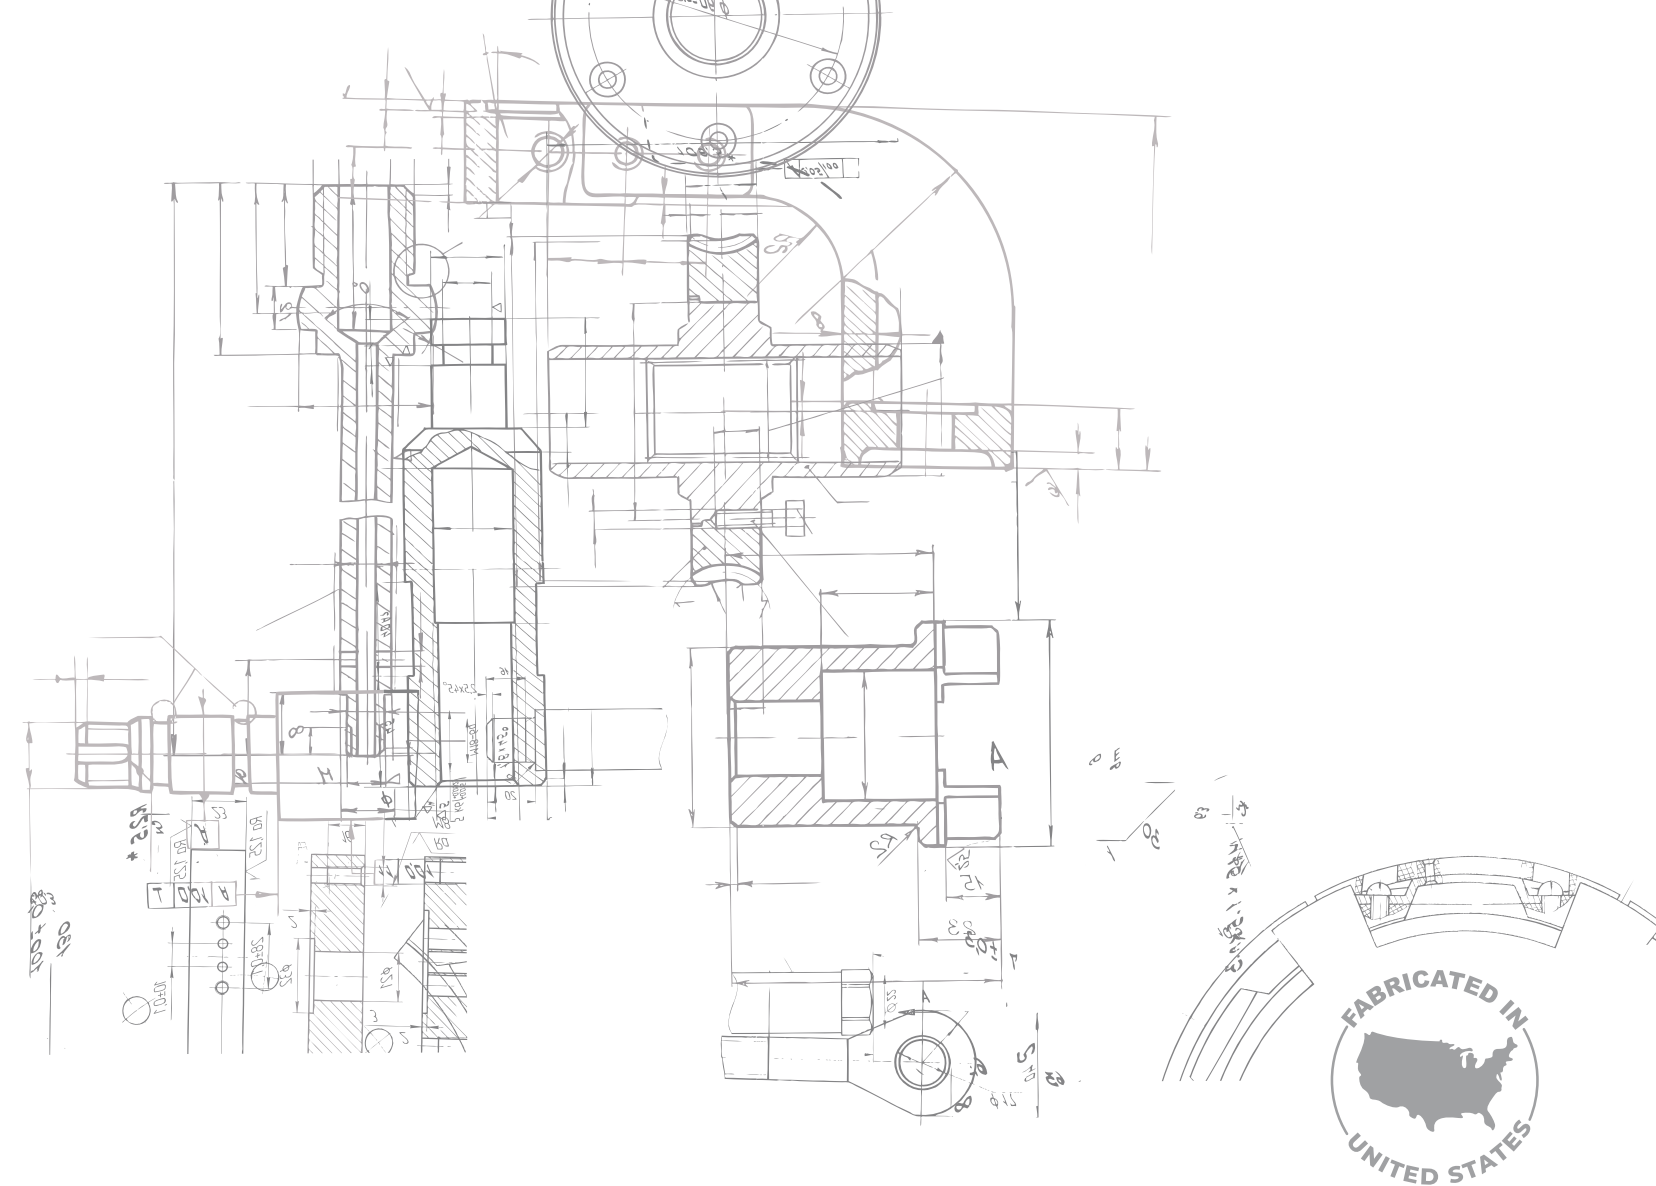

**“Innovation  
drives us.  
Design defines us.  
Deep care  
connects us.”**

# DESIGN & INNOVATION.

Zandur was founded in 2004 by Rob McKee, an innovator who has played a significant role in the development of sustainable commercial flooring products over his 25 years in the industry.

Rob is the sole innovator and creator of modern cork-rubber flooring as well as commercial cork flooring. Additional innovation includes the development of a totally unique cork wall covering system as well as numerous design improvements both in cork and rubber products including being the first company to offer planks in rubber flooring.

Be assured, every product that Zandur brings to market will bring a new opportunity to improve access to design oriented, sustainable and exciting commercial interior products.

## First and foremost, Zandur sells design.

In all products that Zandur offers, Design is the leading criteria in terms of product development. We strive to offer simple, straight forward and easy to specify products in current color palettes. You will find concise lines of

product that are customizable and scalable to allow each design to be unique, but not in ways that make the selection and specification process overwhelming, confusing and time consuming.

# TECHNOLOGY.

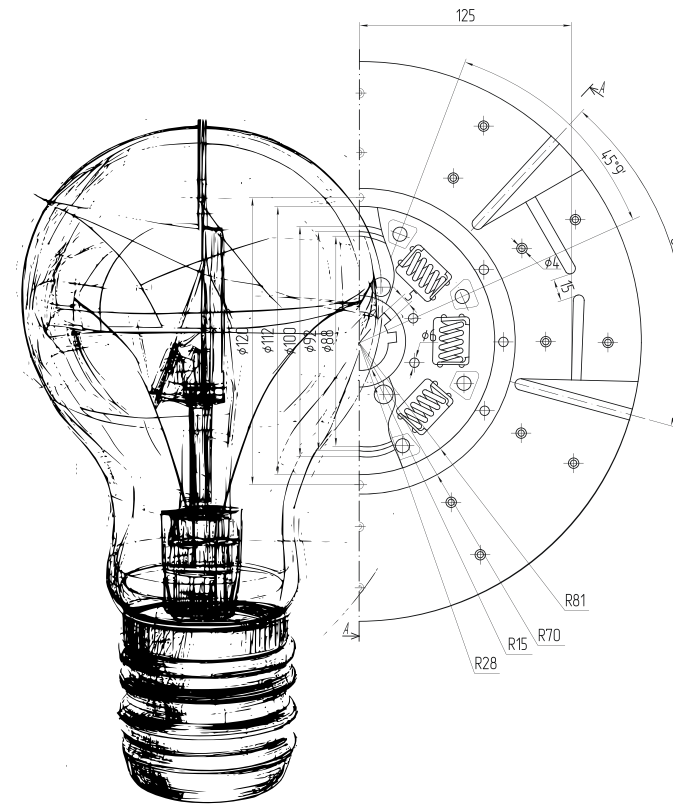

## Nitrile Rubber

Zandur is the only rubber flooring company that makes all of its products with Nitrile Rubber, a man-made process that allows superior quality control and colorfastness during the manufacturing process. This ensures we know exactly what raw materials are going into our products at all times.

Zandur Nitrile Rubber does not crack when bent or manipulated and does not release a waxy residue so commonly found in other rubber. Much easier initial maintenance. Zandur products utilize an innovative proprietary formula that eliminates the haze commonly found on rubber products. This reduces the initial maintenance for a more efficient installation. Other than cleaning off any dirt/debris from the job site or adhesive residue during install, there is virtually no initial maintenance requirement.

### Qualities

- Improved stain resistance. Inherently oil and grease resistant.
- Higher class of slip resistance due to a reduction in wax and the elimination of plasticizers.
- Free of natural rubber which is a known skin irritant and allergen. Zandur Nitrile Rubber is plasticizer and latex free.
- Nitrile does not negatively affect indoor air quality.
- Matte finish. Appropriate for Living areas where shiny floors can be an issue with visually impaired and compromised advanced-care patients.

### RUBBER OFFERS OTHER BENEFITS

- Qualifies for LEED credits under multiple categories
- HPD and Product Specific EPD
- Mindful Materials Transparency
- Aligns with the criteria of the Common Material Framework
- Declare, Red List Free
- PVC free
- Impenetrable
- Inherently antimicrobial and anti-bacterial

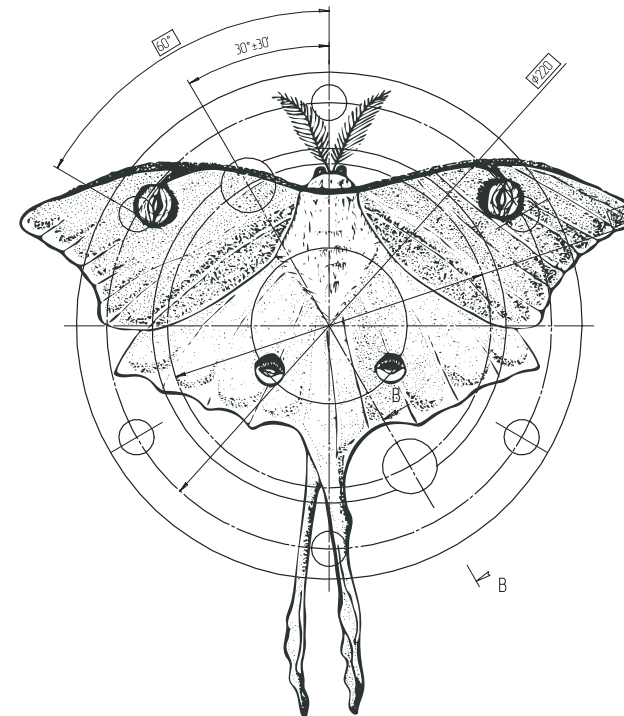

# SUSTAINABILITY.

From its inception, Zandur has remained constant in our philosophy toward absolute transparency and developing products that are sustainable by definition. When you specify Zandur, you know every product is PVC-free, Red List chemical-free, IAQ compliant, and meets or exceeds all common sustainability requirements.

In the fast-moving market of sustainable products and never-ending sustainability certifications and programs, it's easy to lose sight of what sustainability means.

To Zandur, sustainability means all flooring and wallcovering products are Red List Free, meet indoor air quality criteria (CHPS), have an expected life cycle of a minimum of 15 years, and have a significant portion of recycled and/or natural content. Additionally, products must not require intensive maintenance processes or harsh chemicals, and the useful life of our products must be far more than industry standards.

Ultimately, Zandur products must contribute positively to a comfortable, clean and safe living or working environment.

All Zandur Collections offer point contributions towards LEED.

All Zandur products are low or no VOC. Volatile Organic Compounds (VOCs) off-gas into the air that affect the living environment.

Zandur complies with FloorScore requirements, along with continued regular testing to ensure we continue to innovate healthy, reliable finishes.

Zandur Collections have been screened for Proposition 65, a program that vets thousands of cancer-causing chemicals, both man-made and natural. Zandur products do not contain any chemicals on the Prop65 list.

Zandur offers a factory- and product-specific EPD for Sustain, Sophros, Flex, Stair Finishes, Praxis, and Tavos.

As an advocate of full product transparency, Zandur participates with Mindful Materials and other like-minded programs.

Transparency and human health are a priority to Zandur. All our collections have full disclosure HPDs for the most current qualifications.

All Zandur Collections are Red List Free and fully Declared at 100 ppm.

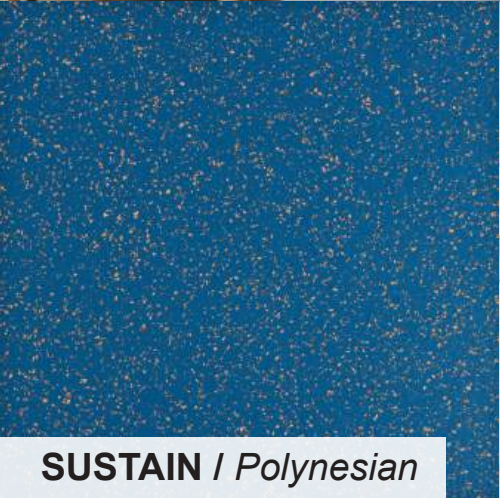

All Zandur products are PVC-free and contain no plasticizers or carcinogens.

children

A still life composition featuring a cork pedestal, a branch with yellow flowers and greenery, and a piece of driftwood against a teal background. The scene is set against a solid teal background. In the foreground, a cylindrical cork pedestal sits on a light brown surface. To the left, a branch with vibrant yellow flowers and lush green foliage is positioned. To the right, a piece of weathered driftwood stands upright. The text 'COLLECTIONS.' is overlaid in white, bold, sans-serif font, preceded by a small white square icon.

■ COLLECTIONS.

SUSTAIN / Polynesian

# Sustain.

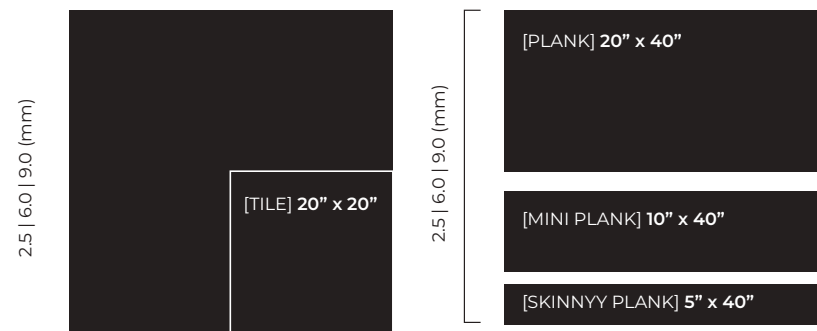

## CORK RUBBER

Sustain rubber cork flooring is the ultimate resilient flooring in terms of durability, comfort, acoustics and sustainability. Subtle tonal variance in the product creates a uniquely rich and organic look.

### FEATURES

- ↳ Uniquely suitable product with an organic/washed concrete visual
- ↳ Superior slip resistance
- ↳ Enhanced acoustics
- ↳ Superior underfoot comfort
- ↳ 60% recycled cork content (this is important, but it's also important that people are aware that this is RUBBER flooring with cork as many people have concerns about using cork flooring)
